

Data.gov 2011: Making Data Sociable

Marion Royal and Jeanne Holm, Data.gov PMO
Kevin Merritt, Socrata

March 2011

Goals of Data.gov

- Break down stovepipes
- Provide instant access to raw data in easy to use formats
- Encourage development of innovative applications
- Provide tools and widgets that to complex data stores

March 18, 2011

Tapping Ingenuity of People Across the Globe

When the Department of Defense released satellite data...
the public created affordable GPS devices!

March 18, 2011

Tapping the Ingenuity of the Public

- **237 applications have been developed by the public...**

Fly On Time

- Transportation data, FlyOnTime.us lets people find the most on-time flights and shortest security-line wait times.

- Integrated to Twitter

March 18, 2011

Employment Market Explorer

- Bureau of Labor local area unemployment data
- This app lets people explore which cities and neighborhoods have the best growth in new jobs

What makes a community?

- Vision
 - What will the community connection and collaboration look like in the future?
- Leaders
 - Who will help to lead the community (a person or core group)?
- Participants
 - Who will be part of the community?
- Outcome
 - What is the value statement to the American public? What are the expected outcomes, metrics, and measurements that will show success?
- Functionality
 - What types of activities will be conducted on the site (forums, blogs, wikis, ranking, rating, etc.)?
- Content
 - What will be communicated now and in the future?
- Interactivity
 - What ways will the community interact with the leaders, with each other, and with the public?

WELCOME TO THE LAW DATA COMMUNITY

The Law Data Community gives you access to legal data from across the Executive Branch in the form of administrative decisions, case filings, legal interpretations and agency directives. The community provides a wealth of datasets of value to legal professionals, researchers, the business community and the general public. Legal authorities covering a range of topics such as transportation, health, energy, education, public safety, housing and many others are available. In addition, advisory opinions and interpretations by agency general counsels provide insight into agencies' current positions on the statutes and regulations they enforce. We hope that this community will be a resource to assist you in the study and understanding of how legal authorities are issued and interpreted by Federal agencies. Please come back often as additional resources in new topics are added.

Data.gov » All Communities

Focus on Data

The Law Data Community brings together for the first time many legal datasets that previously were not easily discoverable. Administrative decisions by agency heads, boards, and administrative law judges, as well as advisory opinions and legal interpretations by agency general counsels are distributed across various agency websites and can be difficult to discover for the general user. The Law Data Community aims to bring these resources together in a site that is searchable and easy to use so that both legal professionals and citizens can find the legal authorities that cover many essential activities, such as tax law interpretations, government contract claims, public transportation safety, and handling of hazardous materials.

WELCOME TO THE HEALTH DATA COMMUNITY

You've found a public resource designed to bring together high-value datasets, tools, and applications using data about health and health care to support your need for better knowledge and to help you to solve problems. These datasets and tools have been gathered from agencies across the Federal government with the goal of improving health for all Americans. Check back frequently because the site will be updated as more datasets and tools become available.

THE HEALTH APPS EXPO

Greetings! You have arrived at the gateway to the online Health Apps Expo. The Apps Expo is an online exposition showing a growing range of applications that have been developed using health data. Here, you'll find examples of what innovators have been doing to harness the power of data to help improve health and create value. We hope you'll be similarly inspired to create applications of your own.

These apps have been created by non-Federal sources and are curated by a non-governmental entity, Health 2.0. The Apps Expo is not moderated by the Federal government, and inclusion in the Expo does not represent any form of an endorsement of that app or of Health 2.0 by the U.S. Department of Health and Human Services. To access the Apps Expo from HealthData.gov, you will be leaving the Federal web site and taken to a website operated by Health 2.0 that is not in the domain of the Federal government.

Visit the Apps Expo.
